ANNOUNCING UBMD CARECONNECT

UBMD CareConnect

UBMD's new telemedicine service

UB|MD
PHYSICIANS' GROUP

we're with you

At UBMD, we like to tell our patients "we're with you" and now we're with them more than ever before with [UBMD CareConnect](#) – UBMD's new telemedicine service. UBMD CareConnect allows our primary and specialty care services to continue providing care to new and existing patients, including for services such as allergy, cardiology, neurology, OBGYN and more. All specialty care services offered by UBMD are continuing to be offered during COVID-19.

UBMD CareConnect provides our patients the vital care they need without having to come to the office. For each visit, UBMD providers and their teams will determine if an

appointment is appropriate for UBMD CareConnect or if an in-person visit is required.

If an in-person visit is needed, our offices are fully staffed to see patients. During the COVID-19 pandemic, UBMD has taken extra [steps to safeguard in-person care](#) so our offices remain a safe environment.

The [UBMD CareConnect](#) page on [ubmd.com](#) will be a one-stop resource for UBMD patients and referring providers.

The UBMD CareConnect page includes links to all UBMD practices offering telemedicine, information on how our telemedicine services work and an FAQ page for patients.

On the site, you can find links to:

- [Dermatology](#)
- [Family Medicine](#)
- [Internal Medicine](#): Primary & Specialty Care
- [Neurology](#)
